

DIY Face mask

The mask should be all bias finished or clean finished all around (no surging where viruses could sit more easily).

The mask must be 100% cotton (no poly/cotton, no cotton mix) for easier wash at home.

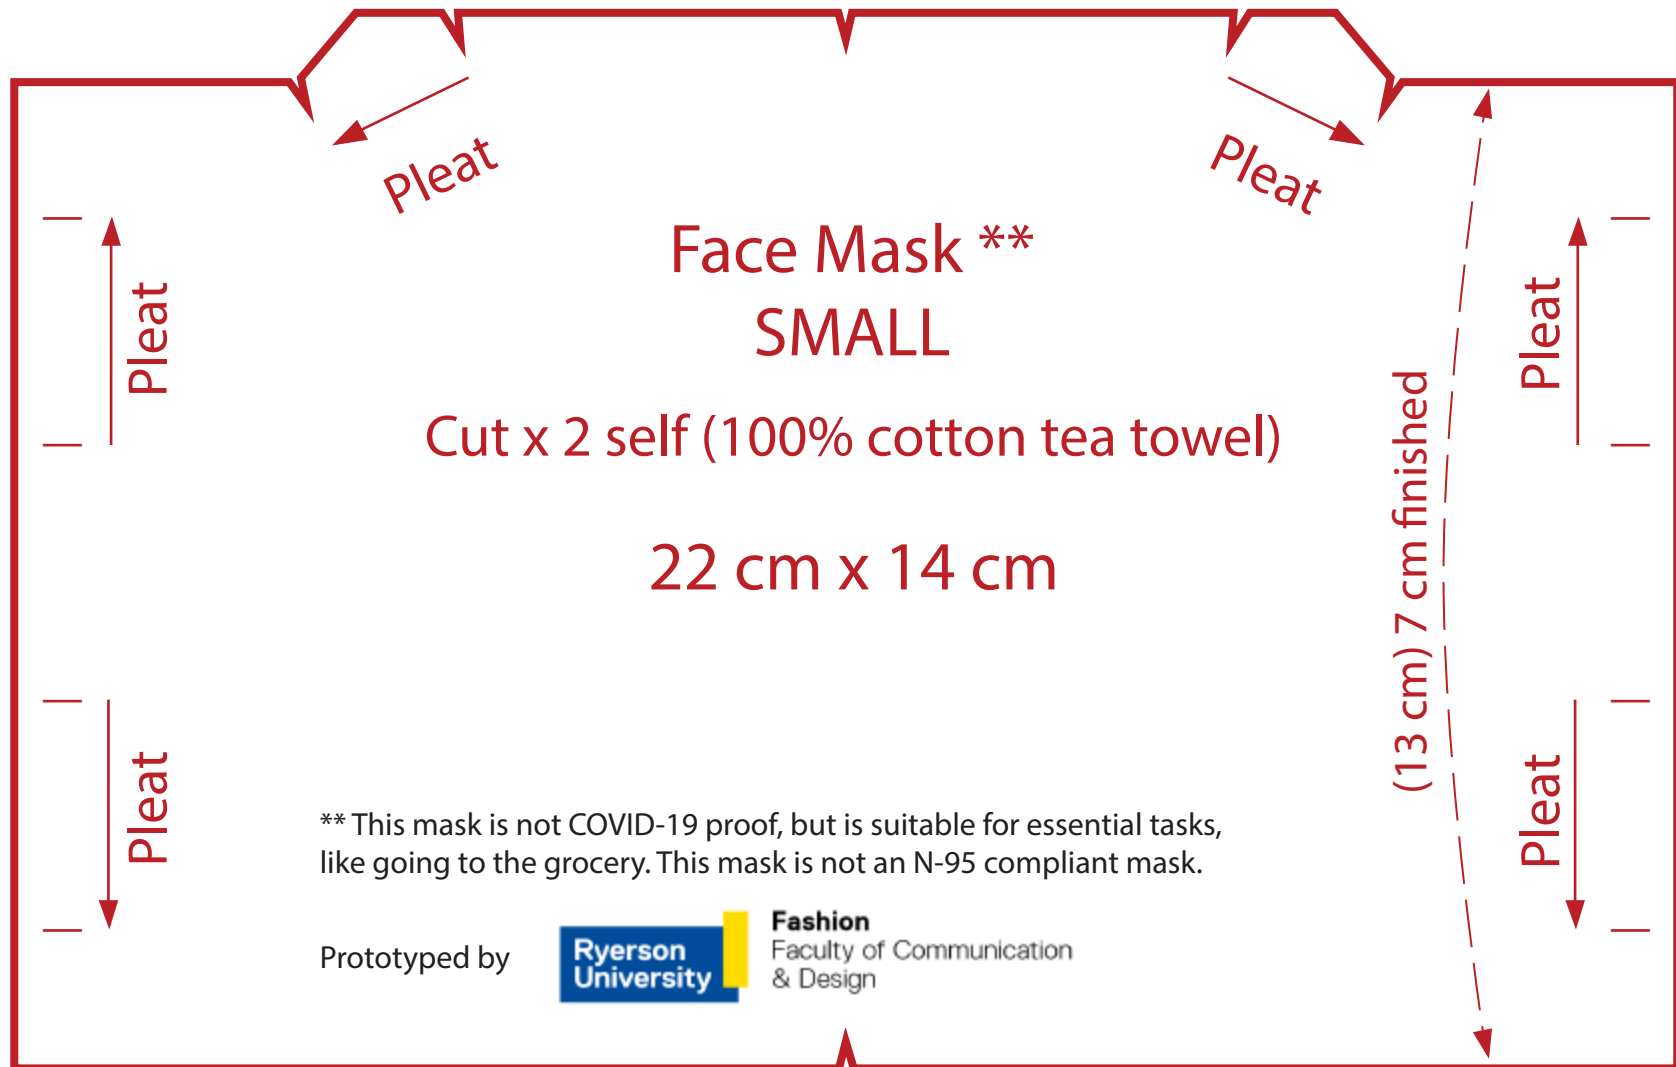

The mask ties are 125 cm long total.

The mask and surfaces that touch the skin should be as white as possible,
if there is a pattern on a white background, use the reverse for the inside of mask.

Colour of straps are less important, but white is better again (as dark colour irritates more easily the skin).
